Professional Summary

Motivated Computer Science undergraduate with hands-on experience in full-stack development using React, Node.js, MongoDB, and Java. Proven track record in building production-style RESTful APIs and secure, AI-powered applications. Passionate about leveraging Agentic AI and IoT security to solve real-world problems.

Technical Skills

- **Languages & Frameworks:** Java, JavaScript, C, Python, SQL, TypeScript, React.js, Node.js, Express.js
- **Tools & Technologies:** Git, GitHub, VS Code, Docker, MongoDB, MySQL, Oracle DBMS, Tailwind CSS
- **Concepts & Security:** Data Structures and Algorithms (DSA), OOP, Agentic AI, IoT Security, RESTful APIs

Work Experience

Web Full Stack Developer Intern

Jan 2025 — Mar 2025

EduSkills

Greater Noida

- Built responsive web applications using React.js and Node.js, improving user engagement metrics by 25% through optimized component rendering and dynamic content delivery.
- Engineered RESTful APIs with efficient database query optimization, reducing data retrieval latency by 15% and enhancing overall application performance.
- Managed the complete development lifecycle including MongoDB schema design, cloud deployment on scalable infrastructure, and implementing continuous integration practices.

Projects

Developer, EduGuard — AI-Powered Student Dropout Prediction System

JavaScript, Java, HTML, CSS

- Developed an AI-powered predictive analytics system to forecast student dropout risks by analyzing academic performance, behavioral patterns, and socioeconomic indicators using machine learning algorithms.
- Identifies at-risk students through multi-dimensional data processing pipelines, enabling timely academic intervention and personalized support strategies for improved retention rates.
- Designed an interactive analytics dashboard with data visualization components to display risk factors, engagement metrics, and trend analysis for data-driven institutional decisions.

Developer, Agentic AI IoT Security — Autonomous Cybersecurity System

Python, JavaScript, HTML, CSS

- Architected an autonomous Agentic AI cybersecurity system to protect IoT devices through real-time network traffic monitoring, anomaly detection, and machine learning-based threat classification.
- Implemented automated intrusion detection mechanisms and deception countermeasures, reducing attack surface vulnerabilities by 40% across connected IoT endpoints.
- Integrated ML models to classify network traffic patterns in real time, identifying and blocking breaches before they compromise device integrity.

Developer, ChessForge — Real-Time Full Stack Chess Application

JavaScript, TypeScript, Java, HTML, CSS

- Built a real-time multiplayer chess platform featuring move validation logic, player matchmaking algorithms, and WebSocket-based communication for low-latency gameplay synchronization.
- Developed a responsive interactive UI with complete chess game logic implementation including state management, turn handling, and persistent game history for seamless user experience.

Developer, Travel Mingle — Full Stack Traveler Social Connection Platform

Java, HTML, CSS

- Developed a prototype social platform connecting solo travelers for shared trip planning experiences, using location-based matching algorithms and user preference profiles.
- Implemented core MVP features including user authentication, profile management, trip creation, and sharing functionalities with a complete end-to-end demonstration workflow.

Developer, Secure Full Stack Online Voting System — E-Voting Application

Java, HTML, CSS

- Designed and implemented a secure electronic voting system with tamper-proof digital ballot generation, user verification protocols, and real-time result tallying mechanisms.
- Ensured data integrity through cryptographic hashing of votes and implemented role-based access controls to prevent unauthorized modifications during the election process.

Education

Galgotias University

Greater Noida

Bachelor of Technology (B.Tech) — Computer Science & Engineering

2024 — 2028

- CGPA: 8.12 / 10.0 | Relevant Coursework: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Web Development.

Certifications & Achievements

- Solved 200+ Data Structures and Algorithms problems on LeetCode, GFG, and CodeChef.
- Smart India Hackathon 2025 — Participant.
- Built 5+ full-stack applications with production-ready features.
- Database Programming with SQL — Oracle Academy
- Web Full Stack Development — EduSkills
- Data Structures and Algorithms — GUVI
- OOPS — GUVI
